

PAY BY SCANNING THE ROPAY QR CODE

What is RoPay?

RoPay is the national service for instant payments, developed by TRANSFOND and Romanian banks, which allows fast and secure bank transfers **directly from the mobile banking applications of participating banks**, without introducing manually the payment details.

RoPay service via **QR Code** offered by Vista Bank allows **individual consumers to make proximity, instant transactions, anytime and free of charge**.

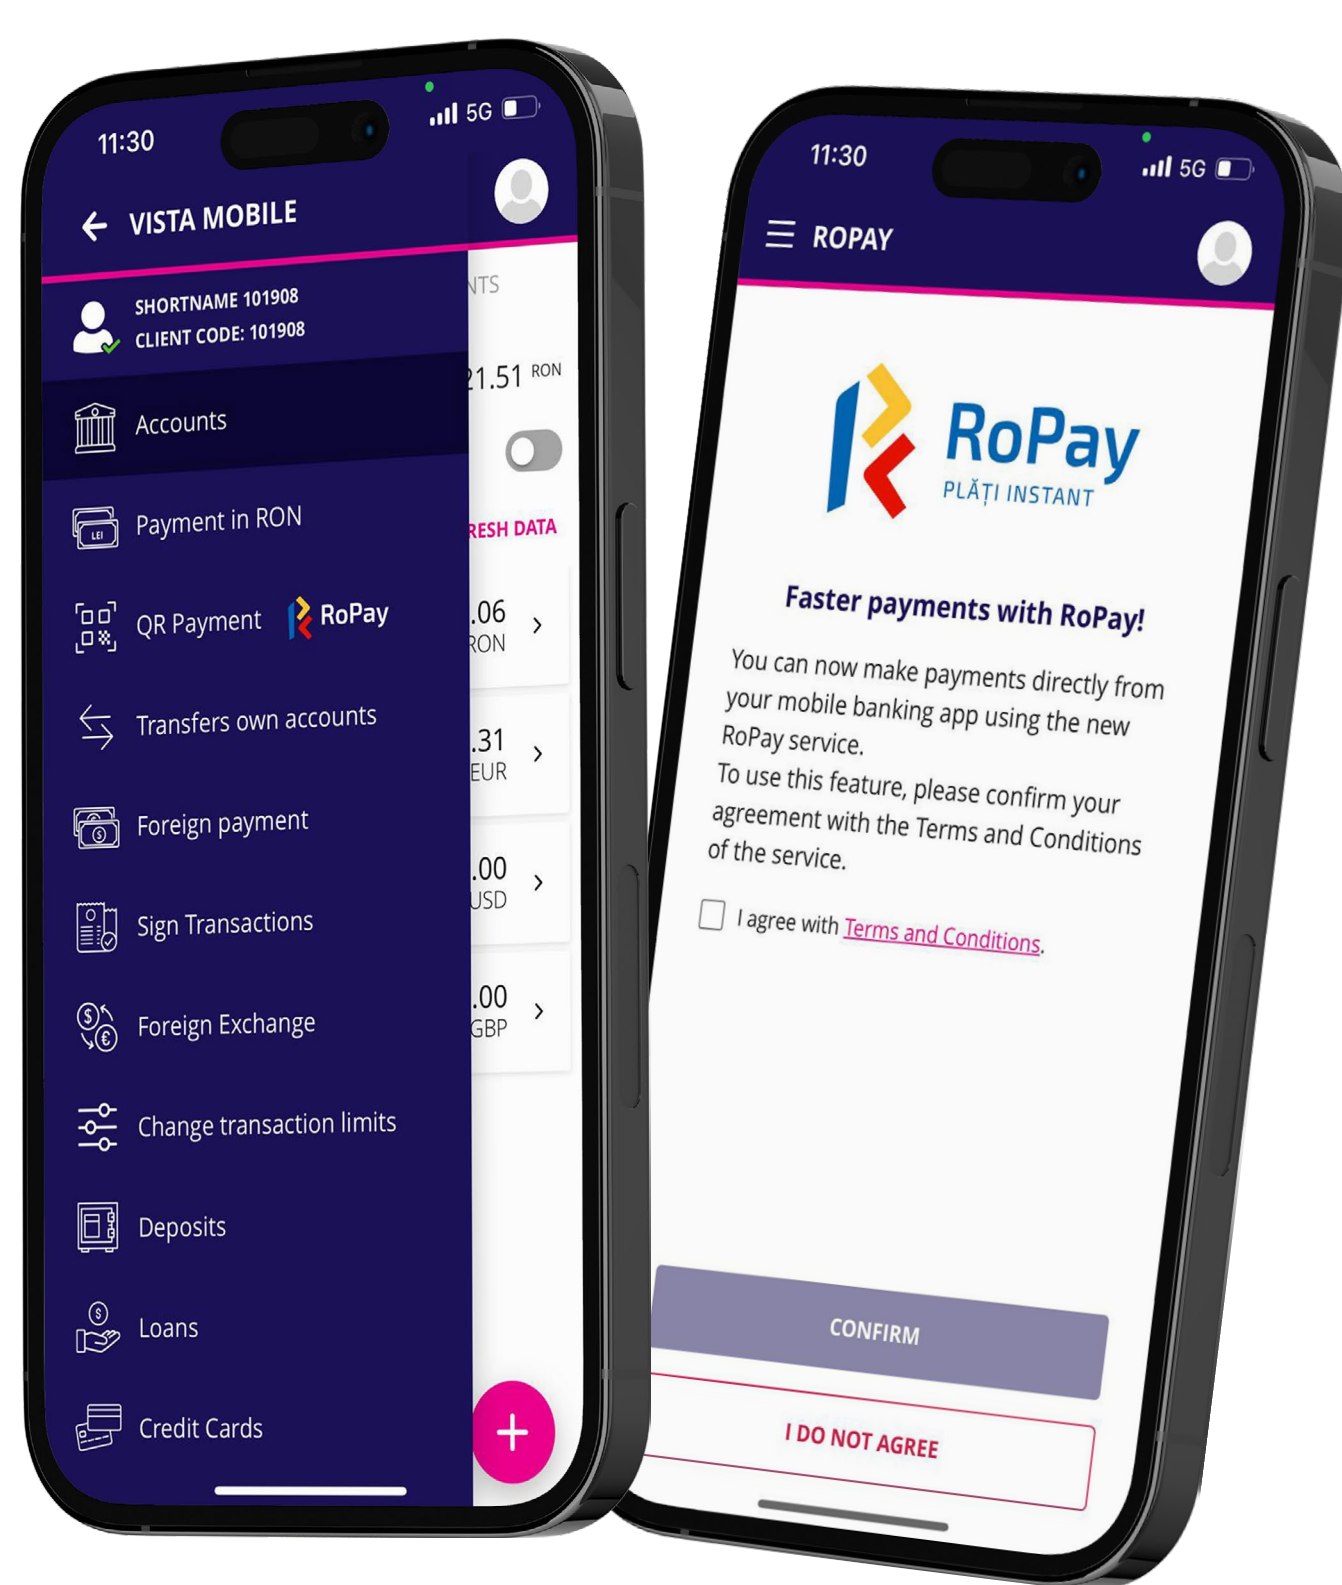

Thus, you can receive / pay money from / to another person that is near you by **simply generate, respectively scan a QR code, without knowing or providing the bank data**.

This guide describes **how to pay via QR Code**.

1 Access the “QR Payment – RoPay” menu

From the Vista Mobile Banking application, access the **“QR Payment - RoPay” menu**.

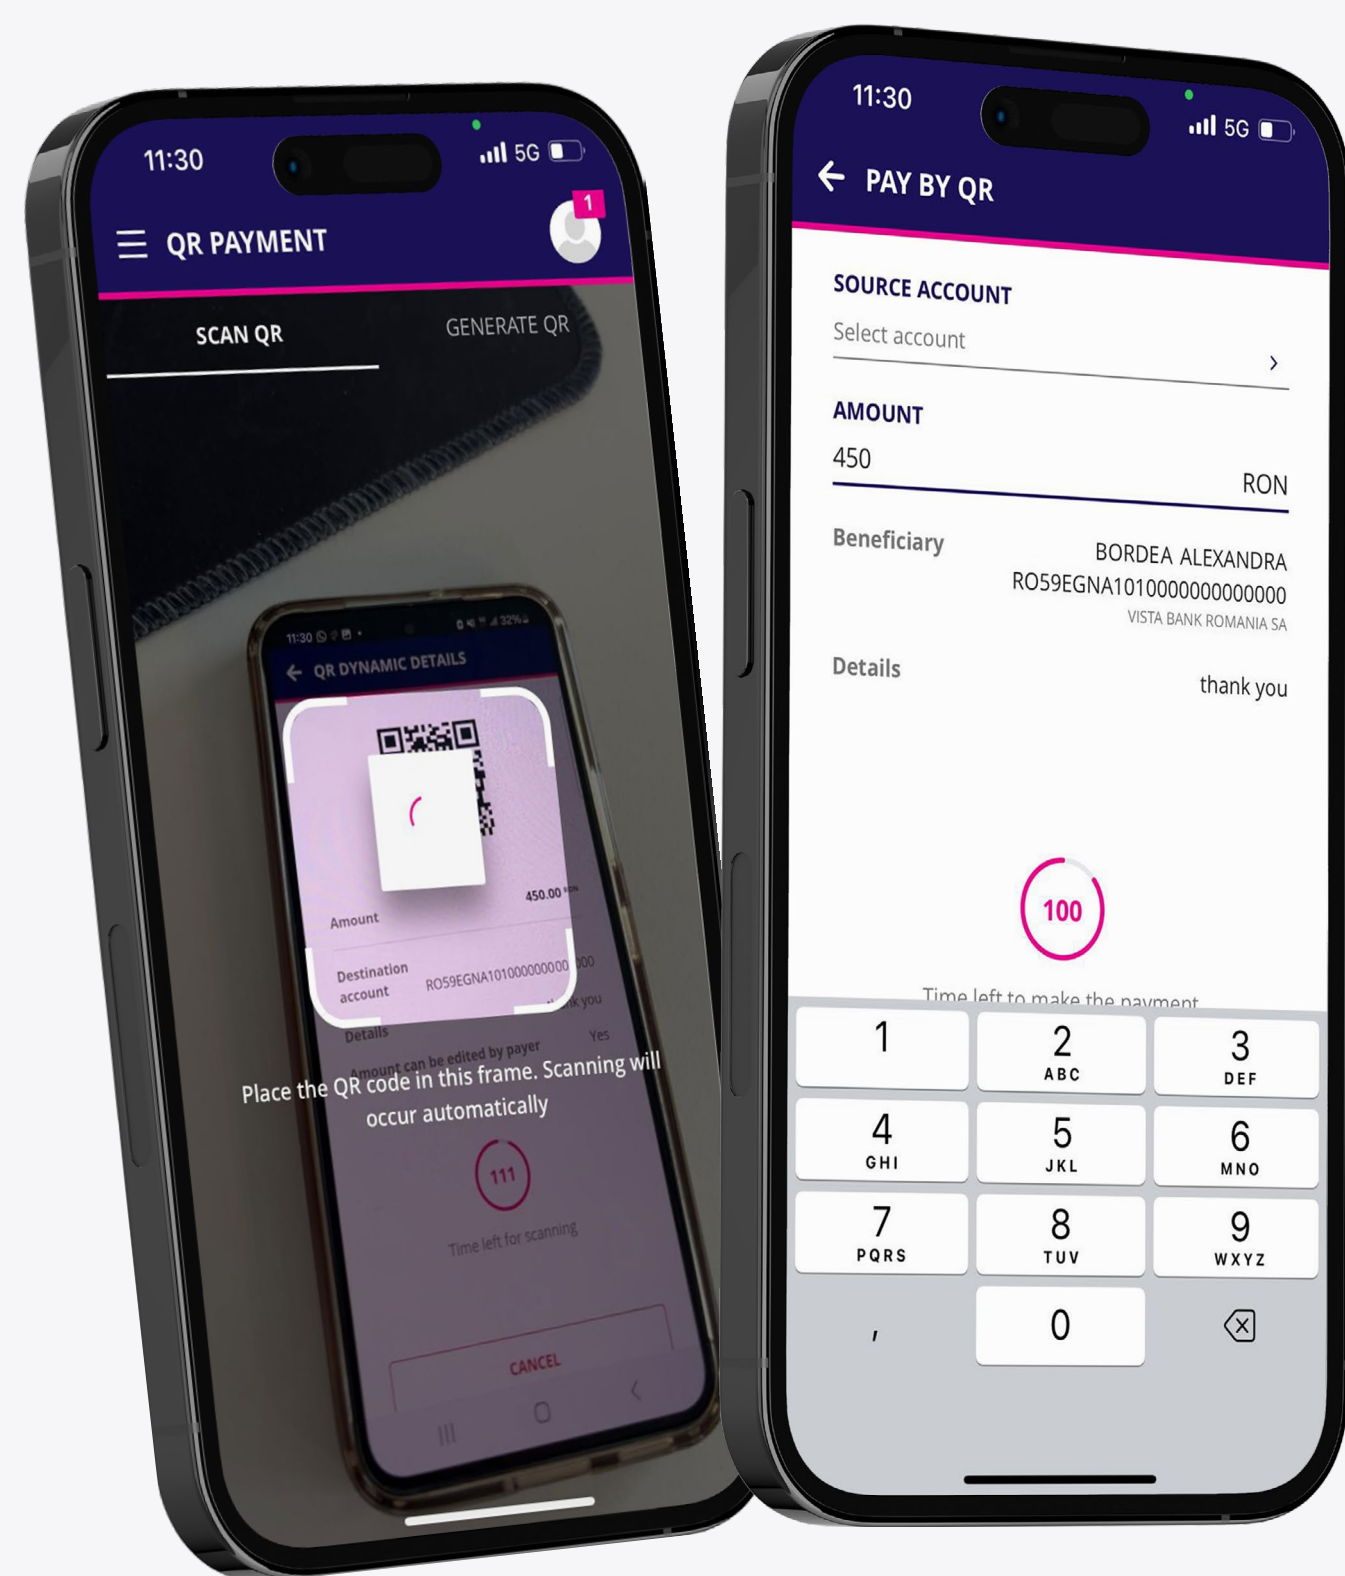

To use the RoPay Service, agree to **the Terms and Conditions** and press **“CONFIRM”**.

2 Scan the QR Code and choose the source account

By default, the application enters the **“Scan QR”** tab and automatically accesses the photo camera. Scan the QR Code generated on the phone of the person you want to pay.

Choose the **SOURCE ACCOUNT**, from which you want to pay the money. If the Beneficiary has allowed the Payer to edit the amount, **you will also be able to modify the amount here**.

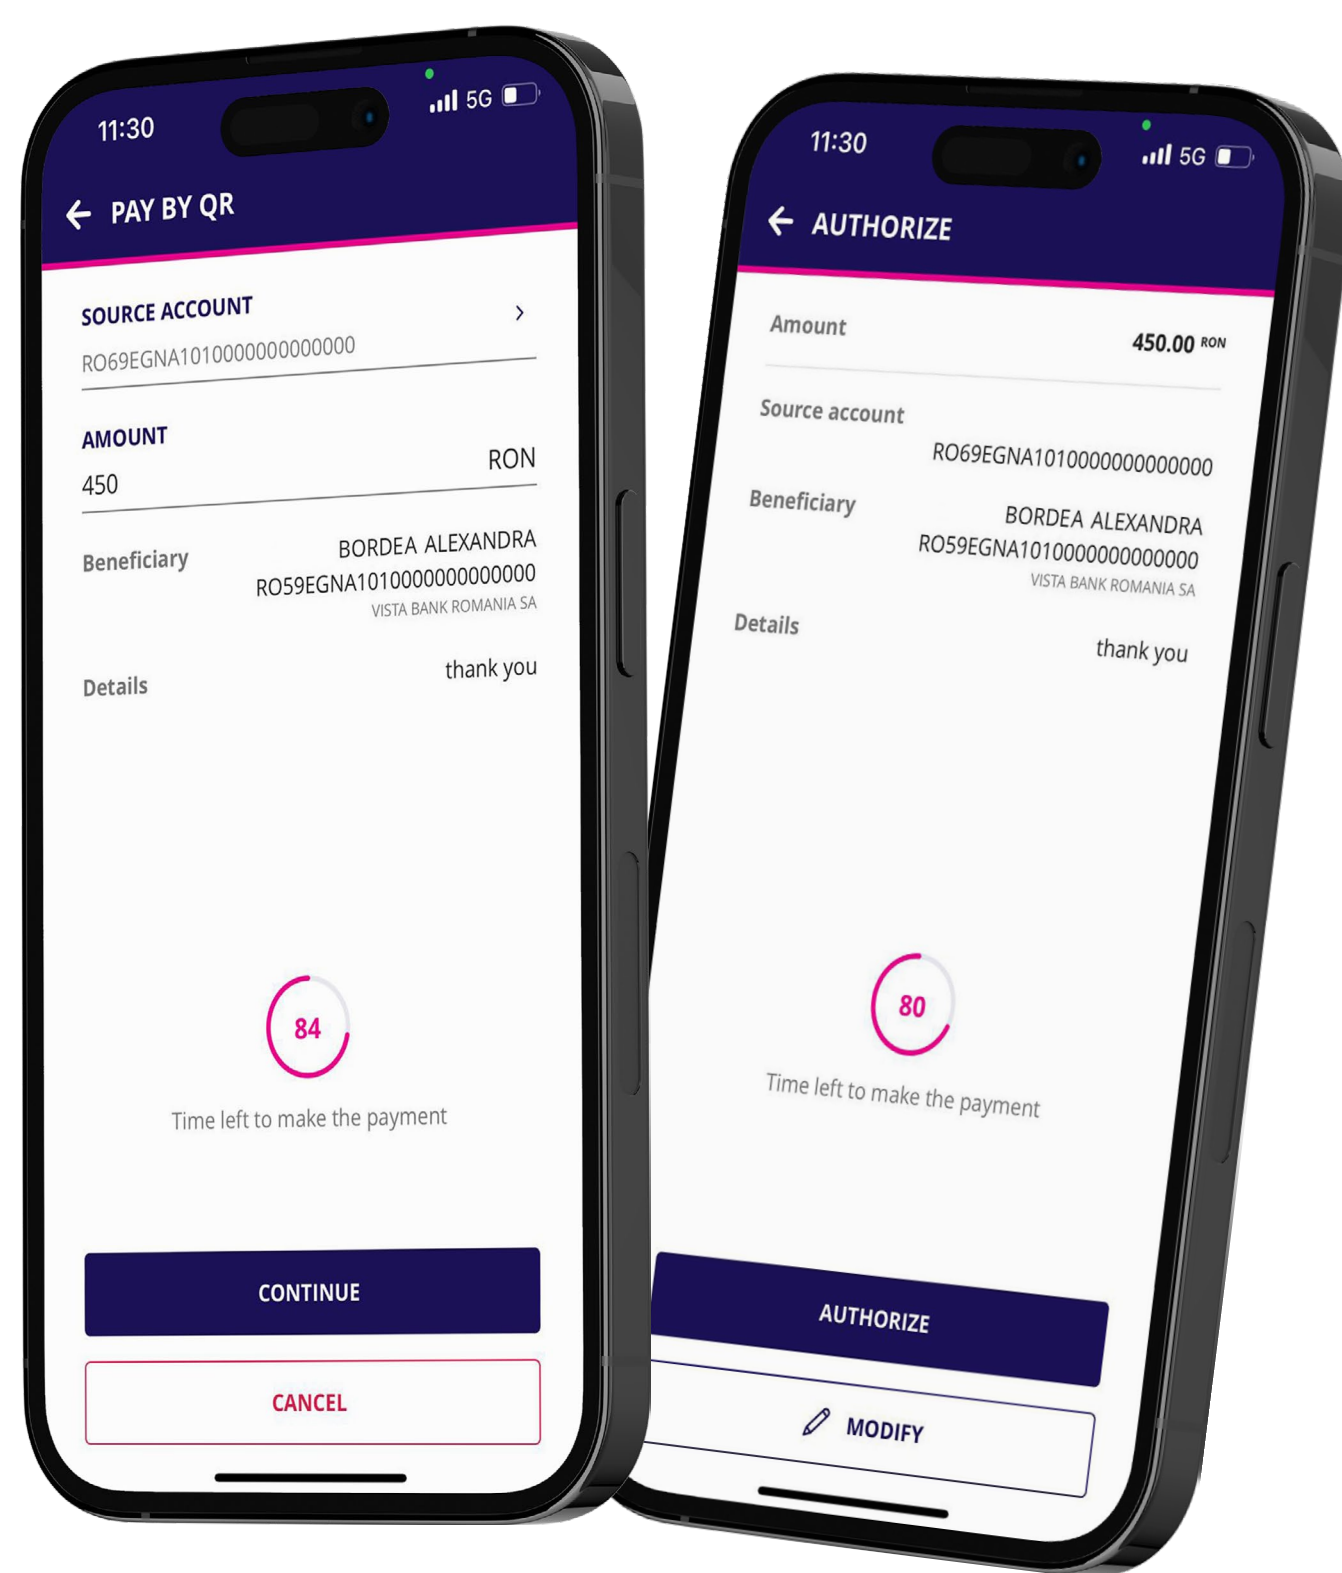

3 Verify all transaction details and authorize payment

Carefully check the amount and the beneficiary's name. If everything is correct, press **“CONTINUE”**.

On the next screen, the bank details are displayed one more time for verification. If everything is in order, press **“AUTHORIZE”**.

Alternatively, you can cancel the payment or modify its details using the corresponding buttons.

4 Wait for the payment to be completed

That's it, you have nothing more to do!

Just watch the screen until you see the message **“TRANSACTION COMPLETED!”**

That's it! Simple, right?
