VISTA INTERNET/ MOBILE BANKING

Thank you for choosing the Vista Internet/Mobile Banking applications!

Vista Internet/Mobile Banking is a fast and comfortable alternative to access your accounts anytime and anywhere, order transactions or manage your liquidity and credits, both from a computer or laptop, as well as from a mobile phone or tablet.

You now benefit from a series of new functionalities, but also from an improved user experience:

- The token integrated in the **Vista Mobile Banking** application offers increased security through the possibility of authenticating access or operations using biometrics or a PIN code.
- The possibility to attach documents when sending messages to the Bank through the **Vista Mobile Banking** application was implemented.
- You can easily edit the name of the account and set a favorite account from Vista Mobile Banking.
- Personal data such as email and mobile phone number can be changed, which will be used in the relationship with the Bank in Vista Mobile Banking.
- The user can disable access to the **Vista Mobile Banking** application and reinstall the application without having to contact the Bank.

Using Vista Internet/Mobile Banking services, you benefit from lower commissions compared to transactions made at the counter.

What are the Vista Online Banking applications?

1

Vista Internet Banking: browser-based application, which can be accessed from a laptop or PC, that allows you to perform the operations listed in the section "Functionalities of the applications - Vista Internet Banking". Registration in the **Vista Internet Banking** application and authorization of operations is carried out through the electronic token integrated in **Vista Mobile Banking** mobile application, which you need to install.

Vista Mobile Banking: the application that turns your smartphone (Android or iOS) into your mobile bank, available anywhere and anytime. Contains an integrated electronic token for authentication and authorization of operations.

For complete information about the products and services offered by the bank, please consult the **General Business Terms** by accessing the files **Terms and Conditions Individuals** and **Terms and Conditions Legal Entities** available on our website <u>www.vistabank.ro</u>.

A few words about Security

We would like to mention that Vista Bank **does not and will never request your authentication data** that only you must know (password, OTP code, PIN code) through any means of communication.

The confidential data can only be used by you at the time of authentication in the Bank's applications.

If, while using the Vista Internet/Mobile Banking applications, you notice **an unusual behavior of the application**, as well as the appearance of a message announcing that **the application is unavailable and/or asking you to re-authenticate and/or enter a new OTP code**, **PIN**, **biometric authentication**, **please do not comply with the request**, take a screenshot (as useful evidence for the investigation) and then close the window and contact the Vista Bank team at the email address abuse@vistabank.ro or at the number telephone 021.222.33.10.

- The bank will never request the disclosure, confirmation or modification of personal data and/or bank authentication by accessing a link sent via an email.
- Always make sure that you have access to our Internet Banking service after accessing the official website of Vista Bank Romania: https://www.vistabank.ro. Make sure that, during authentication, you are on the official Internet Banking website of Vista Bank Romania: https://ibkvbr.vistabank.ro/eb/.
- Check if the address of the login page starts with the secure connection https:// and not http://
- Next to the URL address of the login page, the information about the owner of the site always appears by the presence of the name Vista Bank and a closed lock, and the format of the URL address is https://ibkvbr.vistabank.ro/eb/.

7

| https://www.vistabank.ro | |
|--------------------------|----------|
| About vistabank.ro | \times |
| Connection is secure | > |

- Always close the work session by pressing the **"log off"** button on the right side of the Vista Internet Banking application screen.
- Do not install on the mobile device applications that allow taking control of the device or can read the information that is displayed on the screen, such as TeamViewer or AnyDesk.

Vista Internet/Mobile Banking applications incorporate the most advanced security technologies, allowing secure operations to be carried out, authenticated with the help of a **PIN code** or through **biometric authentication** (fingerprint for Android devices and facial recognition for IOS devices) with the help of an electronic token integrated in **Vista Mobile Banking**.

At the same time, **Vista Mobile Banking** integrates the **Appshielding security functionality**, which ensures high protection against a wide range of sophisticated cyber-attacks. Moreover, **Vista Mobile Banking**, the version for Android, also integrates **Malwarelytics Antivirus**, which protects your entire mobile device against possible malicious applications (mobile malware).

To better protect your computer, mobile phone or tablet, please consult the security recommendations on our website <u>www.vistabank.ro</u>.

You can access **Vista Mobile Banking** from any phone connected to the Internet, with Android or iOS operating systems:

| Operation system | Supported versions |
|------------------|--------------------|
| Android | +8.0 |
| iOS | +11 |

You can access **Vista Internet Banking** from any computer or laptop connected to the Internet, with an operating system / Windows / Linux / MAC OS and the following browser types:

| Aplication | Supported versions |
|-------------------------|-----------------------|
| Chrome | +73 |
| e Microsoft Edge | +104 (chromium based) |
| 🖉 Safari | +14 |
| 🞯 FireFox Mozzila | +65 |

| O Opera | +58 |
|---------------------|------------------|
| 🖉 Internet explorer | Nu este suportat |

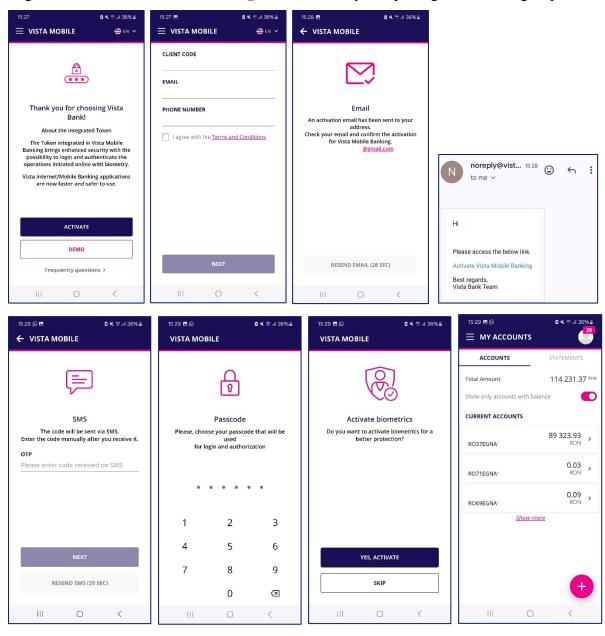

REGISTRATION GUIDE

Vista Mobile Banking

Download Vista Mobile Banking from Google Play or App Store

Registration in Vista Mobile Banking is carried out by completing the following steps:

- Username provided by the Bank after processing the enrollment request.
- **Password** received by SMS from the Bank after processing the enrollment request.
- **Terms and conditions** to initiate the registration process, please read the Terms and conditions by accessing the link in the application and then select the box "I agree with the Terms and conditions".
- **Email address** the address registered in the Bank's records. The email address will be validated through an automatic email that you will receive during the registration process. If you do not receive an email, please also check Spam.
- **Mobile phone number** mobile phone number registered in the Bank's records. The mobile phone number will be validated by an OTP code sent automatically via SMS during the registration process.

Note:

If you receive a message that the entered data is not correct, please contact your colleagues in the territorial unit.

About the PIN Code

- It must contain 6 digits
- It must not contain more than 2 identical digits, or more than 2 consecutive digits
- It must not be similar to the last 6 codes used
- If it is entered incorrectly 3 times, access to **Vista Mobile Banking** application will be automatically restricted and you will need to follow the steps presented in Registering in **Vista Mobile Banking** again.

About biometry

- Depending on the capabilities of the device used, you can authenticate with your fingerprint or face. Facial authentication is only allowed for devices that are classified with **STRONG BIOMETRY CLASS 3**.
- We recommend activating biometrics from the first registration in **Vista Mobile Banking** application.
- Activating biometrics ensures increased security and offers easy and fast access to the application, but also in the process of authorization of operations.
- If you did not activate biometrics during registration, you can do so later by accessing the Settings menu Vista Mobile Banking application.
- If you receive the message below, it means that your phone does not have a registered biometric authentication method or the registered method is not part of a secure class (STRONG BIOMETRY CLASS 3) that can be used to access financial applications.

For authentication, it is necessary to complete:

- Username provided by the Bank after processing the enrollment request.
- **Password** received by SMS from the Bank after processing the enrollment request.
 - For the first login, the Password used to connect will be the one received via SMS on the personal phone number declared at the time of requesting the Vista Internet Banking service;

- After the first login, you must set a new password. This password must be keept secret, no other person, not even Bank employees should know it.
- **O** Password Security Requirements:
 - mandatory minimum length: 8 characters;
 - maximum length: 50 characters
 - format: the password must contain at least numbers, lowercase letters, uppercase letters;
 - possibility of reuse: the password must be different from the last 3 passwords used;
 - validity: 90 days;
 - automatic blocking: after 5 failed connection attempts, without time limit.

Nota:

If you have forgotten your password, you can change it by pressing the button **Forgot your password?** from the login window, following the steps described in the application.

If you entered the wrong password 5 times, you will receive the message "The user is blocked" and it is necessary to contact the Bank at the phone number available on the website.

| III C |) < |

Note:

The **MT940** account statement (only for legal entities) can only be issued in TXT format and is available for an account or a selection of accounts through which transactions took place on the selected day. The "DAILY" option allows the selection of the desired day, provided that it is a closed operational day, respectively any working day prior to the current day

By accessing any of the accounts you can check the settled Transactions, Transactions in processing and Transactions processed with error.

Please carefully check the destination email address written in that field, in order not to send the Account Statement to a wrong email address. Vista Bank Romania does not assume responsibility for errors in writing a destination email address by a client authenticated in Vista Mobile Banking who uses this communication channel to send their account statements.

Payments in RON - Mobile Banking

Payments in RON allows you to make payments in lei from current accounts to beneficiaries who have accounts opened at other banks.

Standard, Urgent or Programmed payments can be initiated from this menu.

| E PAYMENT | IN RON | 28 |
|----------------|------------------|------------|
| PAYMENT TYPE | | |
| Standard | | ^ |
| Standard | | |
| Urgent | | |
| Programmed | | |
| AMOUNT | | |
| 0.00 | | |
| PAY FROM | | |
| Select account | | > |
| Choose othe | er account for (| commission |
| Save templa | te | |
| | CONFIRM | |
| | | |

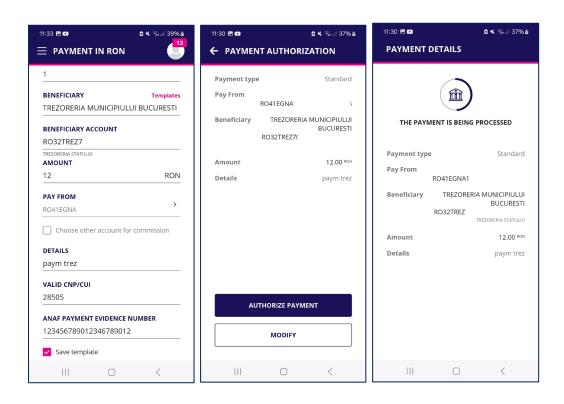

To process a payment in RON, it is necessary to complete the following steps:

- Type or select the beneficiary from the list of templates.
- Enter the beneficiary's account.
- Fill in the amount you want to transfer and the payment details.
- Select the ordering account.
- Check the name of the beneficiary in the "Account holder" field and you will not authorize the payment if the name of the beneficiary displayed by the Bank does not coincide with the beneficiary to whom you want to make the payment.
- Press "Confirm".
- Check the beneficiary's account and the amount
- Confirm the operation.
- You authorize the payment using the PIN code or biometric authentication. If applicable, in this step you can change the payment details before authorization.

Attention!

• In the case of payments to the State Treasury, it is necessary to fill in the CNP, OP No. field and, if applicable, the payment record number obtained from ANAF.

After authorization, the payment will have the status "In processing" and will be found in the corresponding menu. After processing, the transaction will either be displayed in the list of processed transactions if it was processed successfully, or it will be found in the "Errors" list.

| 12:00 ₪ 🖻 🖬 | 0 % %al 54%ê | 11:51 편 🖬 🔹 여 א 🖘 🖬 49% 8 프 PAYMENT DETAILS |

| Energia Gas and Power invoice Fonduri insuficiente/Insufficient funds | 50.00 RON | Amount 50.00 KOK Details invoice |
| | | NEW PAYMENT |
| | ÷ | CLOSE |
| III O | < | |

If the transaction appears in the "Processing" list for more than a few minutes, it should not be re-entered and you need to wait for it to disappear from the list before starting it again. If a transaction appears in the "Errors" menu, the transaction can be initiated again after solving the cause that generated the error.

For more details, please contact the Bank at the number on the website <u>www.vistabank.ro</u>.

Note:

Payments in lei can only be initiated from current accounts, payments in lei cannot be initiated from special accounts: escrow accounts, guarantee accounts, collection accounts, etc.

Transfers own accounts - Mobile Banking

Transfers own accounts allows you to make transfers between your own accounts held at the Bank. In order to make a transfer, it is necessary to complete the following steps:

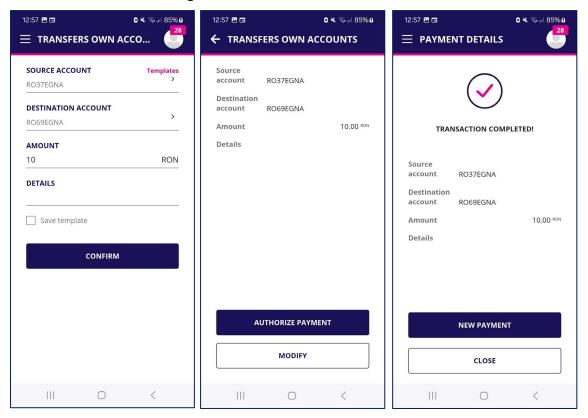

- Select the source account (Ordonator).
- Select the destination account (Beneficiary).

- Enter the amount you want to transfer.
- Confirm the operation.
- You authorize the payment using the PIN code or biometric authentication. If applicable, in this step you can change the payment details before authorisation.

Note:

Transfers can only be initiated from current accounts, transfers cannot be initiated from special accounts: escrow accounts, guarantee accounts, collection accounts, etc.

Foreign payment - Mobile Banking

Foreign payment allows the processing of foreign currency payments abroad or to accounts opened in Romanian currency.

To process a payment in foreign currency, it is necessary to complete the following steps:

- Type or select the beneficiary from the list of templates.
- Enter the beneficiary's account.
- Enter SWIFT Code. (11 digits). The information about the Beneficiary Bank and Address of the Beneficiary Bank will be filled in automatically. If the Beneficiary Bank's data is not filled in automatically, the payment will not be processed and it is necessary to contact the Bank.
- Choose the type of commission.
- Enter the amount.
- Select the ordering account.

- Press "Confirm".
- Check the beneficiary's account and the amount.
- Confirm the operation.
- You authorize the payment using the PIN code or biometric authentication. If applicable, in this step you can change the payment details before authorisation.

Note:

Foreign currency payments can only be initiated from current accounts, foreign currency payments cannot be initiated from special accounts: escrow accounts, guarantee accounts, collection accounts, etc.

Change transaction limits

Change transaction limits menu allows you to change the transaction limits for Internet or Mobile Banking .

To make a limit change, you need to go through the following steps:

- Enter the new daily limit.
- Select the currency
- Select the maximum number of transactions per day
- Turn on the new limit per transaction.
- Select the currency
- Select the validity of the limit by ticking the button to the right of "Validity". If the button

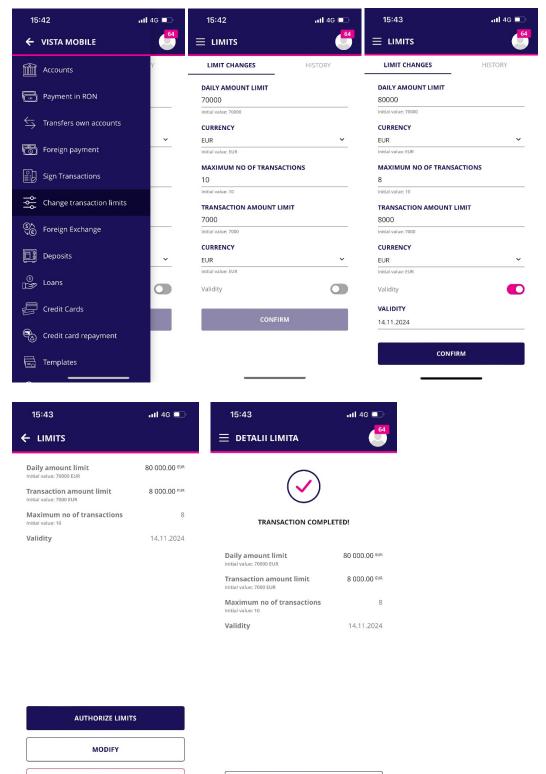

is gray: the limit is permanent, if it is colored: the limit is temporary and the date on which the limit expires must be selected from the "Validity" table.

• Check the entered values and press the "Confirm" button

Note:

The limits can be changed together or separately and must fall within the maximum allowed by the Bank. To find out the maximum, please check the General Business Conditions on the Bank's website.

REJECT

CLOSE

• For a customer who has a joint signature, the limit change is the same as for single signature, just that for the authorization the persons who has the right to sign will authorize the new limit from the Change transaction limits menu.

Multiaccount - Mobile Banking

MultiAccount menu allows you to navigate between the profiles associated with your user: the account of a natural person, the account of a company or another natural person on which you have been authorized.

Appshielding and Malwarelytics – additional security features

Vista Mobile Banking mobile application integrates the **Appshielding** security functionality. This allows the two applications to self-protect against a wide range of sophisticated cyber attacks, such as malware attacks, vulnerabilities related to rooting / jailbreak of the mobile

device, debugging connections (debugger), injection of external Source Code or Framework, repackaging applications and affecting the integrity of the application, ill-intentioned screen readers (screen loggers) or malicious external keyboards, "overlay" type attacks (that overlap the application), Man-in-type attack scenarios the App and Man-in-the-Middle, built-in sensitive key protection (white-box crypto). Whenever a suspicious activity appears, App Shielding responds by taking the necessary protective countermeasures, preventing attackers from modifying the mobile application both while running and at rest.

Vista Mobile Banking integrates **Malwarelytics Antivirus** – a security feature that protects both the Vista Bank mobile applications and your entire mobile device.

When opening the Vista Mobile Banking application, Android version, if any active malicious applications are detected on your phone or tablet (mobile malware), you will be notified of their existence. From the respective screen, you have the possibility to uninstall them immediately, by pressing the icon with the trash can.

In order to benefit from all the improvements periodically brought to our mobile applications,

we recommend that you make sure that they are updated to the latest available versions.

Useful information - Mobile Banking

• To exit the application, please use the Disconnect option by clicking on Profile

• We recommend closing the application from the list of applications to stop running in the background. After a period of a few minutes, the application will automatically disconnect and your data will only be accessible after a new login, but the application will remain active in the background. To log in again if the application has not been

closed, it is necessary to press to authenticate with Face ID or enter the PIN code.

| ○ 📴 PDF 🛛 🟭 MT940 🚯 | |
| E-mail statement | |
| DOWNLOAD BACK | |

Note:

The **MT940** account statement (only for legal entities) can only be issued in TXT format and is available for an account or a selection of accounts through which transactions took place on the selected day. The "DAILY" option allows the selection of the desired day, provided that it is a closed operational day, respectively any working day prior to the current day

By accessing any of the accounts you can check the settled Transactions, Transactions in processing and Transactions processed with error.

Please carefully check the destination email address written in that field, in order not to send the Account Statement to a wrong email address. Vista Bank Romania does not assume responsibility for errors in writing a destination email address by a client authenticated in Vista Internet Banking who uses this communication channel to send their account statements.

• **Transactions** - You can access details about the transactions made from all accounts and you have the possibility to select the accounts for which you want the transactions to be displayed.

| Transactions Approval (6) | Errors Pending Recurrent payments | Payr | nents in the future | | |
|--|-----------------------------------|------|---------------------|---------------|---|
| Document type 👻 | Period | | All accounts | | |

| | | | RO0000093041 | | - |

Searching for a specific operation can be done by Document Type or by entering the element you are looking for in the specially created field or by selecting the type of document and pressing the Search button.

Also from this menu you can export and save a transaction report in PDF, CSV, XML, TXT format.

- select the period for which you want to display the transactions;
- select the source account;
- press the SEARCH button.

The transactions on the chosen account, from the selected period, will be displayed.

Pressing the **Export** button opens a menu from which you can select the report format (PDF, CSV, XML, TXT). After selecting the format, press the **Download** button to save the file.

| Transactions | Approval (6) Err | ors Pending | Recurrent payments | Payments in the futur | e |

| Download Back | | | | | |

By accessing the button on the right the selected transaction you can:

- **Open** the payment order in the application;
- **Duplicate** the operation in case you want to initiate a similar payment;
- **Download PO** a copy of the payment order will be downloaded to the computer;
- Send email by e-mail payment confirmation (PDF payment order).

Attention! The button is active only for payments made through applications Vista Internet/Mobile Banking.

• Also in this screen you can view the transactions that are in different stages of processing:

Transactions Approval (6) Errors Pending Recurrent payments Payments in the future

• **Approval** – transactions that are waiting to be authorized. Authorization of transactions can be done individually, by clicking on the button Authorize individually, or by bulk authorization of payments - Authorize bulk.

| Transactions | Approval | Errors | Pending | Recurrent payments | Payments in the future | | |

| DOMESTIC PAYMENT | 14 JUL 2022 | | | | | 1.0 | 00 RON |
| DOMESTIC PAYMENT | 06 DEC 2021 | | | | | 4. | 00 RON |

- Errors transactions that have not been processed
- **Pending** authorized transactions awaiting the final response from the Bank's applications
- Recurrent payments list of recurring payments
- Payments in the future the list of payments set to be processed on a certain date

Note:

In the case of transactions that appear in the "In processing" list, you need to wait for them to disappear from the list before starting them again. If a transaction appears in the "Errors" menu, the transaction can be initiated again after solving the cause that generated the error. For more details, please contact the Bank at the number on the website <u>www.vistabank.ro</u>.

- Errors This section will open a window in which the Processed with error / Rejected / Canceled transactions will be displayed, for all accounts. Transactions can be processed with errors for the following reasons: unavailable, blocked account, non-updated client, debits to the bank, at the client's request, etc.
 - All transactions Processed with error/ Rejected/ Canceled can be displayed by selecting "Any status" or they can be filtered according to the type of error and the period.

Payments - Internet Banking

Payments in Lei

Pay in lei menu allows you to make payments in lei from current accounts to beneficiaries who have accounts opened at other banks.

Standard, Urgent, Future Payments, Recurring Payments or Payment Batches can be initiated from this menu.

To process a payment in lei, it is necessary to complete the following steps:

- Select the payment type.
- Type or select the beneficiary from the list of templates.
- Fill in the amount you want to transfer and the payment details.
- Select the ordering account.
 - Check the name of the beneficiary, which appears in the "Account Holder" field and you will not authorize the payment if the name of the beneficiary displayed by

the Bank does not coincide with the beneficiary to whom you wanted to make the payment.

- Complete the details of the transaction.
- Press the "Continue" button
- Check the beneficiary's account and the amoun
- Confirm the operation Confirma
- Primesti notificarea push pe telefonul mobil pentru autorizarea operatiunii.
- Autorizezi operatiunea cu ajutorul codului PIN sau prin autentificare biometrica pe mobil.

Dupa autorizare, plata va avea statusul "In procesare" si se va regasi in meniul corespunzator. Dupa procesare, tranzactia fie va fi afisata in lista de tranzactii procesate in cazul in care a fost procesata cu succes, fie se va gasi in lista "Erori".

Attention!

For legal entity clients: if multiple signatures are required to approve a payment, the 2nd user, who must authorize the payment, will find the transactions to authorize in the Accounts menu \rightarrow Transactions submenu \rightarrow the Authorization button or in Notifications (in the home screen, top part).

Attention!

Payments in the future - must be authorized on the day they were entered, and in the case of joint signatures, the first signature is signed on the day of entry, and the second signature can be signed either on the same day or at the latest one day before the date set for processing payments.

If the transaction appears in the "Processing" list for more than a few minutes, it should not be re-entered and you need to wait for it to disappear from the list before starting it again. If a

transaction appears in the "Errors" menu, the transaction can be initiated again after solving the cause that generated the error.

For more details, please contact the Bank at the number on the website www.vistabank.ro.

Note:

Payments in lei can only be initiated from current accounts, payments in lei cannot be initiated from special accounts: escrow accounts, guarantee accounts, collection accounts, etc.

Foreign payments

Foreign payments currency menu allows the processing of foreign currency payments abroad or to accounts opened in foreign currency in Romania.

Standard, Urgent, Future Payments or Recurring Payments can be initiated from this menu.

To process a payment in foreign currency, it is necessary to complete the following steps:

- Type or select the beneficiary from the list of templates;
- Return beneficiary account;
- Enter the SWIFT Code (11 digits). The information about the Beneficiary Bank and Address of the Beneficiary Bank will be filled in automatically. If the Beneficiary Bank's data is not filled in automatically, the payment will not be processed and it is necessary to contact the Bank.
- Select the type of commission;
- Enter the amount;
- Select the ordering account;
- Press the "Continue" button;
- Check the beneficiary's account and the amount;
- Confirm the operation;
- You receive the push notification on your mobile phone to authorize the operation.
- You authorize the operation with the help of the PIN code or through biometric authentication on the mobile.

Note:

Foreign currency payments can only be initiated from current accounts, foreign currency payments cannot be initiated from special accounts: escrow accounts, guarantee accounts, collection accounts, etc.

Attention!

If the multiple signature of the 2nd user, who must authorize the operation, is required to approve a payment, you will find the transactions in the Accounts mode \rightarrow Transactions sub-module \rightarrow the Authorization button or in Notifications (on the home screen, top part).

If the transaction appears in the "Processing" list for more than a few minutes, it should not be re-entered and you need to wait for it to disappear from the list before starting it again. If a transaction appears in the "Errors" menu, the transaction can be initiated again after solving the cause that generated the error.

For more details, please contact the Bank at the number on the website www.vistabank.ro.

Internal transfers

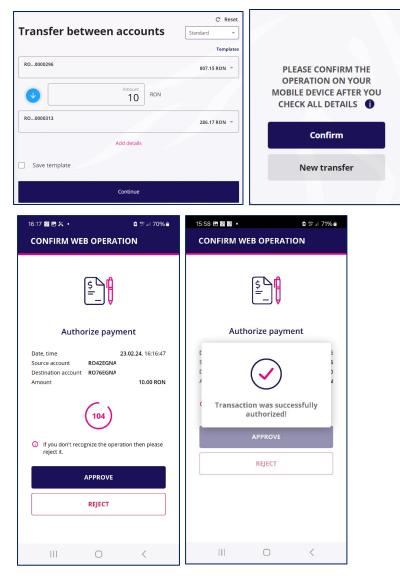

Internal transfers menu allows you to make transfers between your own accounts held at the Bank. In order to make a transfer, it is necessary to complete the following steps:

- Select the source account (Ordonator).
- Enter the amount you want to transfer.
- Select the destination account (Beneficiary).
- Press "Continue".
- Confirm the operation.
- You receive the push notification on your mobile phone to authorize the operation.
- You authorize the payment using the PIN code or through biometric authentication on the mobile after pressing Continue.

Note:

Transfers can only be initiated from current accounts, transfers cannot be initiated from special accounts: escrow accounts, guarantee accounts, collection accounts, etc..

Beneficiaries list

Beneficiaries list can be used to delete from the list beneficiaries who are no longer used so that they no longer appear in the list when payments are initiated. Beneficiaries are automatically added to this list with each payment.

| Beneficiaries | | | |
|---|------------------|-------------|---|

| LOT 1 | RO6 | Delete | : |

Import files – legal entities

This type of operation is valid only for legal entity clients.

"**Import files**" submodule allows uploading payment files in lei and foreign currency, in the Vista Internet Banking application, in compliance with the formats communicated by the Bank.

For details on how the files should be created, please refer to the section Instructions for completing bulk payment files of this document.

To upload a file with payments, it is necessary to go through the following steps:

- Click to open a window where you can select the payment file
- Complete the Control Amount, which must be identical to the total amount of payments in the file;
- Press the Import file button.
- To authorize the operations click View payments or you will find the transactions in the Accounts mode →Transactions submodule→ the Authorization button or in Notifications (on the home screen, top)→ Bulk Authorization.

Pending transactions

Pending transactions transactions allows you to check authorized payments that are waiting to be processed by the Bank.

If the transaction appears in the "Pending transactions " list for more than a few minutes, it should not be re-entered and you need to wait for it to disappear from the list before starting it again. If a transaction appears in the "Errors" menu, the transaction can be initiated again after solving the cause that generated the error.

For more details, please contact the Bank at the number on the website www.vistabank.ro.

Change transaction limits

The **Change transaction limits** menu allows you to change the transaction limits for Internet or Mobile Banking transactions.

To make a limit change, you need to go through the following steps:

- Enter the new daily limit.
- Select the currency
- Select the maximum number of transactions per day
- Turn on the new limit per transaction.
- Select the currency

• Select the validity of the limit by clicking on the calendar icon to select the date, if a date is already selected and you want to delete it, click on the "X" to the right of the

calendar . Once deleted, the limit becomes permanent.

- Check the entered data once more, then press the "Continue" button.
- You are redirected to confirm the change on your mobile device.
- Confirm the limit change on the device.

Note:

The limits can be changed together or separately and must fall within the maximum allowed by the Bank. To find out the maximum, please check the General Business Conditions on the Bank's website.

In the Limit History submenu you can see the last 10 limit changes made.

Foreign exchange - Internet Banking

Foreign exchange allows making exchanges at the Bank's rate between own accounts or at negotiated rates.

| Second Se | Foreign exchange |
|--|----------------------------|
| | Negotiate foreign exchange |
| exchange | Negotiated FX list |

To perform a currency exchange at the Bank's standard exchange rate, it is necessary to complete the following steps:

- Select the source account.
- Select the destination account.
- Enter the amount you want to buy or sell. •
- Check the applicable Bank rate. •
- Confirm the operation by pressing the button •
- You receive the push notification on your mobile phone to authorize the operation. •
- You authorize the payment using the PIN code or through biometric authentication • on the mobile after pressing "Confirm" button.

Note:

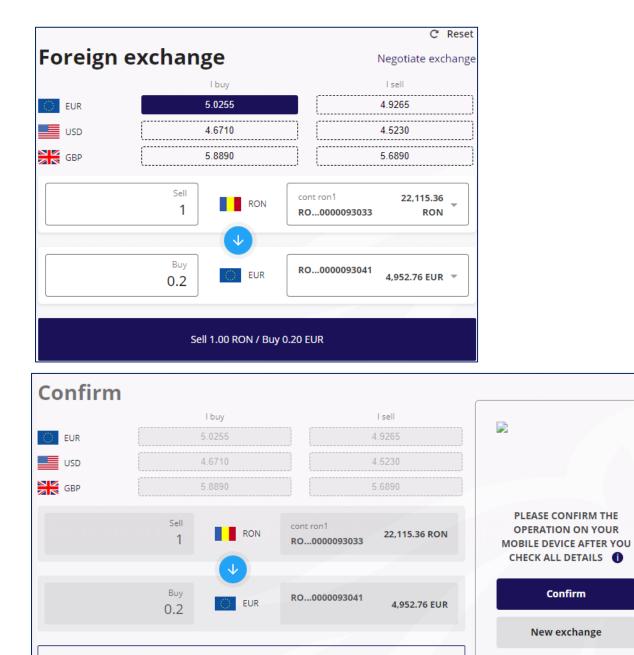

Currency exchanges can only be initiated from current accounts, currency exchanges cannot be initiated from special accounts: escrow accounts, guarantee accounts, collection accounts, etc.

Atenttion!

If multiple signatures are required to authorize a payment, the 2nd user who must authorize the operation will find the transactions the Accounts menu \rightarrow Transactions in submenu \rightarrow Authorization tab or in Notifications.

Sell 1.00 RON / Buy 0.20 EUR

NAME Name and Surname of the client, a natural person or Name of the client, a legal entity.

Note: If the connected user is a user for several clients, he can change the client for which he wants to use the Vista Internet Banking service using the arrow to the right of the client's name.

User name (username) – The arrow next to the user name opens a menu from which you can change your personal data and access password in the Vista Internet Banking application, you can view the list of the most recent connections and you can disconnect from the application.

Messages – the correspondence section between you and the bank.

Notifications – the section where you will receive various notifications related to the Vista Internet Banking service or other banking products.

Any operation initiated through the Vista Internet Banking system goes through the following stages:

- **Pending authorization** transactions introduced in the application that will be executed by the bank following authorization;
- **Pending** transactions imported into the bank's transaction system;
- **Processed** transactions settled by the bank.

Attention!

Payments not processed by the bank for objective reasons (lack of availability, blocked account, customer not updated, bank debits, customer request, etc.) will go into Error status. The list of operations that require authorization can be found in the Accounts menu, Transactions submenu, Authorization tab, as well as in Notifications.

All the information presented in this manual, including the images (screenshots), are presented for a strictly demonstrative purpose and do not represent real offers from the Bank.

Instructions for completing bulk payment files

XML File Domestic Payments

Creating the file:

Open a text file with the following structure

<?xml version="1.0" encoding="utf-8"?>

<SWIFT103>

<DOCUMENT extRef="" tipPlata=" " contExt=" " suma="" dataPlatii="" document="" detalii="" beneficiarNume="" beneficiarIban=" " beneficiarCnpCui="" trezoCodAnaf="" />

<DOCUMENT extRef="" tipPlata=" " contExt=" " suma="" dataPlatii="" document="" detalii="" beneficiarNume="" beneficiarIban=" " beneficiarCnpCui="" trezoCodAnaf="" />

</SWIFT103>

Then complete the following fields with the payment details:

- Field extRef Payment Reference: Unique reference for the payment for each client and each day. [maximum 100 characters];
- Field paymentType Payment Type:
 - T = treasury
 - E = interbank
 - I = intrabank
 - Maximum 1 single character.

- Field amount Amount: Payment amount. It must be in the format 9999.99 (use a period as the decimal separator);
- Field paymentDate Payment Date: In the format dd.mm.yyyy, representing the payment date. It can be the current day or a future day;
- Field document Document Number: Document number [maximum 30 characters].
- Field details Details: Payment details [maximum 105 characters];
- Field beneficiaryName Beneficiary Name: Name of the beneficiary [maximum 100 characters];
- Field beneficiaryIban Beneficiary IBAN: Beneficiary's account in IBAN format, without spaces;
- Field beneficiaryTaxId Tax ID: Mandatory for treasury payments [maximum 30 characters];
- Field treasuryAnafCode ANAF Code: Fill in for treasury payments optional [maximum 30 characters].

CSV File Domestic Payments

Creating the file: Open an Excel file and fill in the following columns with the payment details, corresponding to each field.

| AB | C | D | E | F | G | Н | I |
|--------|-------------------------|---|------------|---|---------|--------------------|------------------------|
| 56 E I | RO24EGNA101000000122076 | 5 | 14.10.2025 | 0 | detalii | Exemplu SA plata 1 | RO34XXXX10100000000000 |

- Column A Payment Reference: Unique reference for the payment for each client and each day. [maximum 100 characters];
- Column B Payment Type:
 - T = treasury
 - E = interbank
 - I = intrabank

Maximum 1 single character.

- Column C Payer Account: The account from which the payment is ordered, in IBAN fomat, without spaces. It is validated that;
- Column D Amount: Payment amount. It must be in the format 9999.99 (use a period as he decimal separator);
- Column E Payment Date: In the format dd.mm.yyyy, representing the payment date. It an be the current day or a future day;
- Column F Document Number: Document number [maximum 30 characters];
- Column G Details: Payment details [maximum 105 characters];
- Column H Beneficiary Name: Name of the beneficiary [maximum 100 characters];
- Column I Beneficiary IBAN: Beneficiary's account in IBAN format, without spaces;
- Column J Tax ID: Mandatory for treasury payments [maximum 30 characters];
- Column K ANAF Code: Optional, completed for treasury payments [maximum 30 characters].

TXT File Domestic Payments

Domestic payments through file import can be made to beneficiaries who have accounts at

other banks or at Vista Bank.

Step 1:

Creating the file. Open an excel file and fill in the following fields on the first line:

Unique payment reference, Payment type, Paying account, Amount, Payment date, Document

number, Document date, Payment details, Beneficiary name, Beneficiary IBAN, Bank ID,

Unit bank, Fiscal code, ANAF code.

Example:

Fill in the payment data corresponding to each separate field on the following lines:

• Column A - Unique payment reference: unique payment reference for each customer and each day (only numbers);

• Column B - Payment type:

- T = treasury
- E = interbank
- I = intrabank
- Column C Paying account: the account from which you order the payment, in IBAN format, without spaces;
- Column D Amount: payment amount. It must be in the format 9999.99 (the point is used for the decimal separator);
- Column E Date of payment: in dd.mm.yyyy format, representing the date of payment. It can be the current day or a day in the future;
- Column F Document number: Document number (only numbers);
- Column G Document date: in dd.mm.yyyy format, representing the document issuance date, similar to the one completed in the "payment date" field;
- Column H Details: Payment details (max 34 characters must be entered including space is taken into account or more than 35 characters but not fixed 35, otherwise the system will expand one more field which if it does not contain strings will give a NULL error).

IMPORTANT! If you pay salary rights, you MUST add one of the following words to the details: "SALARIU, AVANS, LICHIDARE, DREPTURI FINANCIARE". In the absence of these words, if the beneficiary's account registers a garnishment, the Bank can pay the full amount from the salary income to the judicial executor instead of the percentage required by the law.

- Column I Beneficiary name: name of the beneficiary;
- Column J beneficiary IBAN: the beneficiary's account in IBAN format, without space;
- Column K Bank ID: not to be filled in by the customer, it will be filled in automatically by the system;
- Column L Name of the bank it is not filled in by the customer, it will be filled in automatically by the system;
- Column M Fiscal code of the beneficiary: mandatory to be completed only in the case of payments to the treasury;
- Column N ANAF Code: it is not mandatory to fill in if the client does not have from the ANAF platform, in the case of payments to the treasury, it will be left blank but will be kept as the column;

Step 2:

• After completing the data from Step 1, the first line (table header) containing the names of the completed fields will be deleted.

• The data of the first payment must appear on the first line of the file and not an empty line.

mic.

Step 3:

- Save the file in *.txt format on your computer [from Excel: File menu/ Save as option/ Save as type choose Text (tab delimited) (*.txt)]•
- We recommend that you use a suggestive name to save the file so that you can find it easily when you want to import it into Internet Banking.

XML File Foreign Payments

Open a text file with the following structure:

<?xml version="1.0" encoding="utf-8"?>

<SWIFT103>

```
<DOCUMENT valuta="" contExt="" suma="" prioritate="" comisioaneSpeze="" swiftBancaBenef="" beneficiarIban="" beneficiarNume="" taraIdBancaBenef="" adresaBancaBenef="" bancaBenef="" taraIdBenef=" detalii=""/>
```

```
<DOCUMENT valuta="" contExt="" suma="" prioritate="" comisioaneSpeze="" swiftBancaBenef="" beneficiarIban="" beneficiarNume="" taraIdBancaBenef="" adresaBancaBenef="" bancaBenef="" taraIdBenef=" detalii="" dataPlatii=""/>
```

</SWIFT103>

Then, complete the following fields with the payment details:

- Field currency Currency: The currency in which the payment is made [maximum 3 characters, A-Z];
